

I wish to comment on the proposed expansion of Low Power FM stations which could impact current FM signals sent via translators. Specifically, I want to ensure that any proposed changes would not effect my favorite FM station "AIR 1," heard locally on 90.1 for me in Ontario, California. I believe the station identifier is KLRP.

AIR 1 serves me as a resident of the local community by notifying me of area events and activities. The effect on the local community would be detrimental if AIR 1 were to be displaced by an LPFM broadcaster providing other programming because of the uniquely Christian and conservative message AIR 1 brings to the airwaves. This message is critical to the public for dissemination of Biblical truths and wholesome family values so lacking in our current public discourse.

Thank you for the opportunity to comment.
